EUROPE’S ONLY EXHIBITION AND CONFERENCE DEDICATED TO INNOVATIONS IN MANUFACTURING

Find out more at www.industry40summit.com
ONLY 48 PERCENT OF MANUFACTURERS CONSIDER THEMSELVES READY FOR INDUSTRY 4.0

They need knowledge, training and new technology. If you own a product to make manufacturing smarter, you need to be at Europe’s only event dedicated to Industry 4.0.

Industry 4.0, the 4th industrial revolution, smart manufacturing, digital factories… These are some of the phrases being used today to describe a series of game-changing innovations that are changing the way products are manufactured forever.

Whilst 83% of UK manufacturers are planning to invest in automation and control systems in the future, only 48% of manufacturers across Europe consider themselves ready for Industry 4.0. To remain competitive, thousands of manufacturers need knowledge, training and state-of-the-art information and communication technology to improve productivity, shorten product development cycles and mass produce customised products as efficiently and cost effectively as possible.
April 2017 will see two major manufacturing events hosted in the UK – Industry 4.0 Summit and Factories of the Future. Showcasing thousands of innovations to help manufacturers digitise and upgrade operations, these are Europe’s only events dedicated to the future of manufacturing.

Hosted in Manchester - the world’s first industrial city with the first factories and the first industrial estate – Industry 4.0 Summit will be Europe’s largest gathering of solutions providers, innovators and technology buyers looking to get ready for this step-change in global manufacturing.

Manchester employs over 100,000 people in the manufacturing sector. It is where Rolls met Royce; where Ford started building cars in Europe and where Williams and Kilburn built the world’s first computer. And it continues to host the biggest brands of today, including operations for BAE Systems, Siemens, Kellogg’s, and McVitie’s.
Any company that sells solutions in digital manufacturing. Engineers, factory managers and technology buyers will be there to specifically find innovations to make their operations smarter, cleaner and more productive.

If you can help manufacturers do that, you can sell products at Industry 4.0 Summit.
“AN INDUSTRIAL-SCALE VERSION OF INDUSTRY 4.0, COULD ADD $14.2 TRILLION TO THE WORLD ECONOMY OVER THE NEXT 15 YEARS AND THE UK ALONE COULD BENEFIT BY UP TO $531 BILLION.”

ACCENTURE REPORT: 2015
Industry 4.0 Summit will attract thousands of visitors from a broad spectrum of manufacturing industries – a unique offering for companies looking to sell innovations to new customers in Europe and emerging markets.
"THE FOURTH INDUSTRIAL REVOLUTION IS STILL IN ITS NASCENT STATE. BUT WITH THE SWIFT PACE OF CHANGE AND DISRUPTION TO BUSINESS AND SOCIETY, THE TIME TO JOIN IN IS NOW."

Gary Coleman, Global Industry & Senior Client Advisor,
Deloitte Consulting
THE CONFERENCE:
Innovations to make the revolution possible

Europe’s first Industry 4.0 gathering of leading manufacturers, government, associations and academia. What are the issues, what are the opportunities? 500 figures will meet to learn, debate and drive this industry forward.

THE MEETING PLACE

Using the online matchmaking system, visitors and exhibitors can arrange to meet that elusive industry contact at our special Meeting Place venue in the exhibition hall.

THE EXHIBITION

Over 100 companies showcasing the latest cutting edge technology and services geared for Industry 4.0 and the modern factory.

MEET THE CONSULTANTS

Looking to expand your business, develop a product, finance expansion? Visitors can meet with leading industry consultants from finance, change management and manufacturing excellence.

AWARDS/EVENING RECEPTION

Conference attendees, speakers and exhibitors will be welcome to visit the wonderful Manchester Town Hall for an evening of relaxation. Alongside will be the inaugural ‘Innovations in Manufacturing Awards’ night.

OPEN TECHNOLOGY FORUM

Learn about the latest innovations and technology at the Open Technology Forum, where over 30 papers will be presented in a specially designed 100 seater auditorium.
WHAT SHOULD THE NEW FACTORY LOOK LIKE?

Technology is moving so fast you need to know what is happening now in order to make decisions for the future. What will industrial production look like 10 to 20 years from now? How will your factory compete with brand new factories that use next generation communication systems and concepts?

Comprising a dedicated exhibition and a series of free seminars adjacent to Industry 4.0 Summit, Factories of the Future will bring together factory owners, plant managers and manufacturing heads to discover the latest technologies and services available for them to successfully compete for the next 20 years of production.
1. Expand on Export Potential by meeting thousands of buyers and resellers from around the world.

2. Demonstrate and explain the benefits face-to-face.

3. A Print and Digital Advertising Campaign valued in excess of €500,000 in key trade media.

4. An Online Meeting System will allow you to screen buyers and request meetings before the show.

5. An Online Product Showcase will enable you to profile your products and services in an online library ahead of the show.

6. A Dedicated Marketing Toolkit will provide you with numerous ways to promote your brand and products within marketing communications, completely free of charge.

7. The Attendance of International Media will provide an ideal platform to launch new products or upgrades.
CONFIRM YOUR PARTICIPATION TODAY

To discuss the opportunities for your company in Industry 4.0 Summit or Factories of the Future, contact:
